

Highly diverse and productive coral reefs, fast growing mangrove forests, fisheries of many varieties and clean tropical marine waters are the basis of a resource system which has supported coastal communities in the Philippines since people first arrived. Now, these resources are threatened with overexploitation, destruction and pollution. This book helps us value these ecosystems and their products so that we can be better stewards and managers. It is we that must improve our ways and defining value may be the key to this change.

The Coastal Resource Management Project is implemented by the Department of Environment and Natural Resources, supported by the United States Agency for International Development with management and technical support provided by Tetra Tech EM Inc. Address: 5th Floor, Cebu International Finance Corporation Towers, cor. J. Luna and Humabon Streets, North Reclamation Area, Cebu City, Telephone: (032) 232-1821 to 22, 412-0487 to 89, 412-0645, Fax: (032) 232-1825, CRM Hotline: 1-800-1-888-1823, E-mail: prccebu@usc.edu.ph, Website: <http://www.oneocean.org>

The Values of Philippine Coastal Resources: Why Protection and Management are Critical
